Automatically hide your TV
with a framed work of art.

Stealth CoverArt™

Hide your flat screen display with a work of art that you choose.

*Stealth CoverArt shown with matching Image II on-wall speakers.

As TV displays have grown larger and larger, they now take up more and more valuable wall space. These large screens are great for today's home theaters, but unfortunately, when the display is powered down, the big screen is just a large gray area in the room.

Stealth CoverArt solves this problem by blending any flat screen display into the décor of the home or office by automatically converting it into a beautifully framed photograph or work of art.

Your selected image is printed on fine art grade fabric surrounded by your choice of elegant wood moulding.

Select a work of art from one of our renowned artists or enjoy the freedom of supplying your own custom image.

When the display is powered on, the Stealth CoverArt rises to reveal the display's screen without any obstruction. When the display is turned off, the art lowers to conceal the dull gray screen.

Pair your Stealth CoverArt with matching Stealth Acoustics Image Series speakers to further compliment your room's aesthetics while enjoying high fidelity sound - right from your artwork!

A Uniquely Affordable, and Easy-to-Install Display Cover Solution

- A hidden motor raises and lowers the artwork when the display is turned on or off
- Can be customized with any high-quality photograph, or choose from hundreds of images in our online gallery
- Each CoverArt is hand made per order to fit an individual display
- Easy to install and lightweight – no mounting hardware to install, no new wiring required
- Low profile – looks like framed art
- Works with both surface mounted displays and recessed displays
- Built with care in the USA

How To Order:

- Visit StealthCoverArt.com to view choices and download the order form
- Measure the display – just provide the overall display width, height and depth
- Choose an image – (1) provide a high-resolution photo (2) choose a free image from our public domain art collection or (3) purchase an image from our online gallery
- Choose a frame moulding to best match décor and artwork

Each Stealth CoverArt Unit Includes:

- Printed image on fine art grade fabric
- Decorative wood moulding
- Motor and hardware
- Remote control

Easy To Install:

Peel and stick... it's that easy. Because the main structure of the Stealth CoverArt frame is built from aluminum, the entire assembly is very light for its size. The frame is custom made slightly larger than the outside dimensions of the display and is designed to fit over and rest on the bezel of virtually any flat screen display.

- No mounting hardware to install
- No new wiring required

How Stealth CoverArt Works:

The foundation of the CoverArt assembly is an aluminum frame that supports the decorative wood moulding and holds a cylindrical motor within a drive tube. Artwork is printed on a fine art grade fabric and attached to the drive tube. The tubular motor for the artwork is plugged into the hidden infrared motor control unit - a small box that plugs into a standard 110v electrical wall outlet and mounts out of sight behind the display. The CoverArt may be configured to work with most IR control systems or activated via the included remote control so that when the display is turned on or off, the motor control unit activates the motor to raise or lower the artwork.

I. Measure The Display

Measuring is easy.

Simply provide the overall display width, height and depth measurements to ensure a completely custom fit.

Visit StealthCoverArt.com for complete details.

Every Stealth CoverArt unit is custom built in the USA.

Supply your screen size, choose the image you want, and select a frame. Your CoverArt unit will be hand made to fit your display and be ready to mount, plug, and play.

2. Choose An Image

Automatically hide your TV screen with a work of art.

Use a personal image of your own... ..or choose from hundreds of images in our online gallery.

Commercial Applications

CoverArt is an excellent accessory to mask displays in corporate board rooms and conference rooms. Proudly display your company logo while your TV is not in use.

Compare Frame Styles

Frame moulding options are shown next to your selected artwork so you can easily compare styles before choosing the one that best fits your décor.

Choose from hundreds of unique images by professional artists and photographers:

- Landscapes
- Seascapes
- Abstract Art
- Floral
- Cityscapes
- And much more...

4. Add Sound

Image II

imagine the possibilities...

Stealth Acoustics Image II Customizable On-Wall Speakers

We've taken our award-winning invisible speaker technologies and placed them into a fully customizable, low profile, high performance on-wall art speaker system.

Utilizing a solid, flat-front radiating surface Stealth Acoustics Image II speakers have no speaker grills and become the canvas for creating your ultimate artistic vision. Artwork from our online gallery, or customer provided high-resolution images are factory laminated in a "studio wrap" process that turns an Image II speaker into a 3D work of art. Or, the entire speaker may simply be custom painted to match virtually any finish imaginable.

No other on-wall speaker gives you this combination of flexibility and performance in creating the exact look you need to match your aesthetic goals.

Customizable beauty is just a portion of the Image II speakers' value. Audio performance is impressive, with smooth extended frequency response, Stealth's renowned LeverAcoustic™ bass extension, excellent imaging and 170 degree dispersion. Perfect for flat screen reinforcement, or anywhere you need a great looking speaker.

Pair the Image II with CoverArt to form the 3-panel Trilogy
