## ***"FURNITURE SHAPED BY YOUR NEEDS"***

For more than 20 years, Salamander Designs® has been designing innovative, specialized furniture systems that are shaped by your needs. Our products are engineered specifically for their purpose. We produce specialized furniture designed to satisfy the functional requirements of professional AV Integrators and AV enthusiasts. As a 20-year member of the industry's most influential national associations, we feel the pulse of what is happening in technology. This focus has earned Salamander the title of #1 Brand of AV Furniture by CE Pro Magazine.

### ***Specialized Furniture***

As an industry leader, we produce specialized AV furniture and accessories that are designed for professional Integrators and Audiophiles. Our products are engineered specifically for their intended purpose and comply with industry standards such as UL and EIA compliance.

Our facility is designed for materials and production to flow through an efficient process. Salamander manages using "Lean Manufacturing" principles and "pull manufacturing" techniques. This process allows us to Build-to-order thereby allowing us to carry virtually no finished goods stock. The concept is for the customer to "pull" the product through production with his order...you ask for it and we build it.

### ***OUR COMMITMENT***

At Salamander, our business is fueled by our passion to create the highest quality AV furniture on the market, backed by superior service. Like our furniture, we want our relationship with you to last a lifetime. That is our commitment to you!

# FORTRESS SEATING

## ***Solving seating challenges since the 40's...***

Primarily a design-oriented manufacturer, Fortress has been providing seating for executives and board rooms for over 75 years. In the late 1990's Fortress first manufactured theater seating for personal home theaters. With theater seating, design is important. But equally important is the comfort.

## ***Theater seating... The beginning...***

Fortress entered the home theater arena because there was a void when it came to custom seating. Designers were creating beautiful home theaters and integrators were designing custom audio and video, and the need for custom seating was apparent. Even with over 30 standard models from which to choose, the need for custom seating is more demanding than ever.

## ***Our Pledge...***

Our commitment to service doesn't stop once your chairs are delivered. Customers are important before and after the sale. That's our commitment to you and we've honored it for over 75 years.

# Nuvo®

## PLAYER PORTFOLIO.

Designed with the professional installer in mind, the flexible, powerful Player Portfolio system delivers incredible high-fidelity audio to every room of the home. Conveniently available in wired or wireless configurations, the single zone Players and multi-zone rack-mount Players make it easy to build a unified whole home audio experience in up to 16 different zones. Easy to install and even easier to enjoy, the Player Portfolio offers an unparalleled listening experience with endless music options at your fingertips.

## EXPLORE A WORLD OF MUSIC.

The Player Portfolio offers true listening freedom with built-in access to endless music options - from networked audio content and iTunes libraries, to an expansive variety of Internet radio and streaming services. Whether it's an old favorite or the newest hit, your home will be filled with the music that moves you.

# THE PLAYER ECOSYSTEM.

Simply connect a Nuvo Player to the home network and your favorite speakers. To start listening, use the free Player Portfolio app to quickly connect and set up the system. Easily expand home audio to other rooms by adding Players in other zones.

# New World of Wireless Freedom

MusicCast makes it easy to bring music to every room in your home wirelessly with playback controlled by a simple app.

musicCast

# All Your Content

Access streaming music and Internet radio stations music files on your mobile devices and computers, Bluetooth® sources and external sources such as a TV, Blu-ray disc player or even a turntable.

# NERO VOX

ECHO DOT 3<sup>RD</sup> GEN  
IN WALL 2-CH AMP

Front Views Note: ECHO DOT 3<sup>rd</sup> Gen sold separately

The NERO VOX provides a unique custom interface for the ECHO DOT 3rd Generation creating a Powered Docking station that allows access to the four control switches and Alexa Voice communication. The powerful and efficient Class D amplifier can power a single 4-ohm or 8-ohm pair of speakers or two pair of 8-ohm speakers. The amplifier will automatically recognize the load and output accordingly. The NERO VOX allows the customer take advantage of the multiple features of the ECHO DOT Gen 3 while providing step up External Amplification and custom speakers that are optimized for the room placement including In-Ceiling, In-Wall or Cabinet Speakers. The NERO Vox is very versatile covering New Construction, Retro-fit construction or a great upgrade to millions of Custom Whole House systems installed over the last 25 years.

## Putting Aesthetics Over Technology

**INVISIBILITY HAS NEVER SOUNDED THIS GOOD.**

Today's multi-channel surround sound and whole-house audio systems require multiple speaker locations. The result can be an ever growing number of speaker grilles, boxes and hardware that compete with the decor of your living space.

We invite you to experience the freedom of invisibility with our new LineaResponse® invisible speakers. With Stealth Acoustics you get dynamic full range audio placed where you want, without regard to the architectural conflicts that occur with conventional speaker grilles and boxes.

**INSTALLS LIKE A STANDARD DRYWALL PATCH.**

The installation process is as simple as fitting a drywall patch and the speakers may finished with a number of common modern methods. The speakers are built on a solid injection molded frame that contains the traditional drivers and crossovers found in high performance speakers. This portion mounts directly to the structural framing. The face of the speaker is smooth and durable and is designed to finish seamlessly

with the wallboard surrounding it.

Stealth Acoustics speakers are equally at home in the wall or ceiling and the edges of the speaker panel fit flush to the surrounding wallboard. The seams are taped and spackled using standard materials and techniques. Simply sand the seams and apply your desired finish. Possible options include latex paint, flat finish, orange peel texture, light plaster, light wallpaper, or light fabric.

# StingRay

Environmentally Durable Sound

HIGH PERFORMANCE AUDIO

*StingRay 83*

### FULL RANGE, 8" 3-WAY SPEAKERS

Based on the advanced technology behind Stealth's new generation LRX-83 invisible indoor speaker, the StingRay83 raises the bar on outdoor audio.

Never paint a rusty speaker grill again!

Creating a speaker that can take on nature's toughest elements is no easy task but with the StingRay line of Environmentally Durable Speakers, Stealth Acoustics has done just that!

The StingRay family utilizes the same technology behind the award winning, full-range LineaResponse indoor invisible speakers, built into a fully sealed outdoor enclosure. With no exposed grills these speakers achieve an unprecedented Environmental Protection Rating of IP-68 and are at home in rain, sun, snow, and dust and from 0° - 150° F.

## OUTDOOR DISTRIBUTED AUDIO

**StingRay 8**

**StingRay 6**

## OUTDOOR SUBWOOFER

**StingRay 430**

### FULL RANGE, 8" 2-WAY SPEAKER

The StingRay8 is a full-range outdoor speaker featuring deep bass and sparkling highs combined with ultra-wide dispersion characteristics. Excellent for an outdoor theater or where music is forefront.

### FULL RANGE, 6" 2-WAY SPEAKER

The compact StingRay6 is perfectly suited for outdoor distributed audio and background music applications. It's small size allows it to be easily integrated into your outdoor space.

### OUTDOOR SUBWOOFER

Stealth's high-powered, environmentally protected outdoor subwoofer system is the StingRay430. Designed to utilize eight acoustically coupled, high-power, 8" cone woofers and a passive radiator the SR430 creates full, space-filling, outdoor bass.

### FINISH OPTIONS

**StingRay products are offered in either white or black finish as well as custom paint or image wrap finishes.**

**Blend in or stand out!** From camouflaging imagery, to commercial branding, a custom vinyl wrap can help make your installation unique. StingRay speakers can also be custom painted at the factory.

### MOUNTING ACCESSORIES

The StingRay8/3/8/6 each ship with a simple dead-hang bracket that allows for on-wall mounting. Optional accessories include a heavy-duty U-bracket (for overhead or secure installation), ground stake (for landscape installation), or a swivel mount.

# StingRay 8

Soffit Speaker Kit

*The only invisible speaker in the industry -  
StingRay 8 Soffit Speaker Kit. Make your eaves sing!*

*Stealth Acoustics StingRay Speakers are perfect for any outdoor environment!*

# Super Size

The **Stealth Patio Theater** family of large-format, daylight-viewable LED TV systems are designed to offer an unprecedented outdoor entertainment experience for luxury residential, commercial and marine applications.

## *Cover Art Trilogy*

SCREEN COVER & ART SPEAKERS

Hide your room's audio and video components and beautify your space with a Cover Art Trilogy panoramic art installation. The Stealth CoverArt Trilogy package combines the display masking CoverArt system with the award winning Image Art Speakers for an affordable and easy-to-install aesthetic solution.

## ART SPEAKERS

### Image

ART SPEAKER  
& SUBWOOFER

### CUSTOMIZABLE 2-WAY FULL-RANGE ON-WALL SPEAKERS & SUBWOOFERS

Stealth Acoustics understands there are sometimes scenarios where the Invisible Series speakers aren't practical, yet high quality sound and minimum aesthetic impact are desired. The Image Art Speaker & Subwoofer were designed for just that scenario.

Based on the foundation of Stealth's Invisible Series speakers, The Image Art speakers produce clear, crisp sound without grills or exposed openings. The slim, sleek speakers are wall mounted and can be painted/finished to match an interior space or wrapped with a custom canvas print turning them into a work of audio and visual art.

## TV COVERS

### Cover Art

### RETRACTABLE TV SCREEN ART

Furthering the mission of reduced aesthetic pollution is the Stealth CoverArt system. Designed to integrate a video screen display into the décor of a home or office, CoverArt automatically turns it into a pleasing piece of framed artwork.

When inactive, CoverArt appears to be a framed work of art. When activated, the custom printed canvas retracts to reveal the display hidden underneath.

CoverArt systems may be mounted over on-wall TV displays or fitted into recesses. Additional uses for CoverArt have included concealing gun safes, liquor cabinets or other storage areas. Each system is custom designed and built to the specifications provided.

# SÉURA<sup>®</sup>

# ***TV for him. Decor for her.***

## Hidden technology with high design appeal

Incorporating the latest technology into your home doesn't mean compromising your décor. Séura's vanishing mirror displays provide a crisp television image and, when turned off, a fashionable mirror remains without a hint of its technological applications. You decide when a television is in the room with the simple push of a remote control button. No more unsightly and obtrusive monitors!

**INNOVATIVEGLASS**

INNOVATORS & PRODUCERS OF **EGLASS®**

**TINT**

**PRIVACY**

**COMFORT**

LC Privacy Glass... the perfect eGlass solution for interior and exterior residential applications.

- INTERIOR WINDOWS & DOORS
- EXTERIOR WINDOWS & DOORS
- SLIDING DOORS
- HOME OFFICES
- BATHROOM DOORS, WALLS & WINDOWS
- SHOWER ENCLOSURES
- SKYLIGHTS
- ATRIUM ROOMS
- ROOM DIVIDERS

## LC PRIVACY GLASS FOR HEALTHCARE APPLICATIONS

Our proprietary PowerTrack™ allow ICU and hospital room doors and dividers to slide and open with the ability to have all panels fully powered for visibility or privacy.

## LC PRIVACY GLASS FOR RESIDENTIAL APPLICATIONS

Looking for ways to accentuate your home and enhance your lifestyle with next-generation windows, doors and skylights? Searching for a better approach to privacy, without having to block exterior views with shades, blinds or curtains? Look no further than LC Privacy Glass.

LC Privacy Glass opens up many design possibilities, including odd shaped, hard-to-reach and over-sized windows and doors. From bathroom windows and shower enclosures — to entranceway doors and whole exterior wall systems that can transform whenever needed — our eGlass solutions have your home covered both inside and out.

LC Privacy Glass seamlessly incorporates into any home's A/V system, regardless of the complexity, and adds a new "Smart" technology to your home with a wall switch, smartphone, tablet, or by voice command.

### FEATURES FOR HOME ENVIRONMENTS

- Perfect for today's lifestyle and design needs, achieving a greater "wow" factor
- Available in standard or custom sizes and shapes
- We work with industry leaders, including Andersen, Marvin, Pella, Therma-Tru, Fleetwood and many others
- Available fully-framed and pre-wired

### INFECTION CONTROL AND PRIVACY ON DEMAND

As healthcare professionals well know, hospitals face two major challenges: improving healthcare outcomes and upholding patient satisfaction. Fabric curtains provide little privacy or protection — they are not soundproof and collect germs that result in cross-contamination. Window treatments, such as blinds and shades, attract dust and contagions as well. This can compromise patient health and put service reimbursement and revenue at risk.

LC Privacy Glass is a proven eGlass solution that ensures the best of both. It delivers game-changing patient advantages, offering exceptional visual and audible privacy, as well as extreme infection protection while ensuring a more comfortable and pleasant environment.

### FEATURES FOR HEALTHCARE ENVIRONMENTS

- Replaces traditional fabric curtains with a state-of-the-art, maintenance-free, high-tech alternative
- Replaces walls or windows in patient rooms, operating rooms and ICUs, an alternative that's been implemented at numerous prestigious medical centers around the world
- Incorporates larger expanses of glass into hospitals without having to compromise design
- Provides patient privacy and dignity while blocking out stressors and distractions
- Cleaning and sanitizing is easily done by simply spraying and wiping the surface with a disinfecting antibacterial solution
- Sliding, telescopic, and breakaway emergency room and ICU doors can be configured only with Innovative Glass' proprietary PowerTrack™

## LC PRIVACY GLASS

### ■ SWITCHABLE PRIVACY ON DEMAND

Ensure complete privacy with glass that frosts on demand. Switchable LC Privacy Glass, powered exclusively with eGlass® brand technology, features electrically-activated, PDLC / smart glass technology that instantly changes from transparent to frosted white at the touch of a button, by mobile device, or by voice command. LC Privacy Glass is extremely versatile for both commercial and residential applications, and used in windows, stationary and sliding doors, curtain walls, and more.

- Creates 100% privacy on demand
- Controllable by switch, mobile device or voice command
- When transparent, panels allow full view and daylight; when frosted, views are obscured, providing complete privacy
- Operates on 110/120VAC (simple line voltage)
- Can be used for Interior and/or Exterior applications
- Blocks 99% of damaging UV rays
- Available in attack-rated and ballistic configurations
- Available as a pre-glazed, pre-wired window unit, or as pre-cut panels with or without hardware for commercial applications
- All panes are safety-laminated (5/16" thickness and up) and are available as tempered, or in various IGU thicknesses for exterior glazing systems

## LC PRIVACY GLASS

### FOR COMMERCIAL APPLICATIONS

## ■ TRANSPARENCY AND PRIVACY — ALL IN ONE

Glass Walls and Doors for Conference Rooms, Executive Offices, Showrooms, and More

**W**hy do so many of the world's Fortune 500 companies choose Innovative Glass for eGlass® brand technology? Simple. The environments we create help promote productivity in beautiful open spaces, while also providing visual, and a high level of audible privacy when needed.

Rooms created with electronically switchable LC Privacy Glass, that instantly transform from transparent to opaque, are tailor-made for commercial applications. This explains why companies such as IBM, Apple, GE, Pratt & Whitney, Caterpillar, Boeing, and others, have turned to Innovative Glass, and have joined the revolution of eGlass technology.

Whatever your design specifications — from glass thickness to custom wiring, sizing, shaping, notching and mounting — we've got you covered. Innovative Glass engineers smart wall system solutions that feature electronically switchable LC Privacy Glass, built-to-order to integrate seamlessly into most fixtures and casings.

Whether you're an architect, interior designer, property or business owner looking to maximize square footage — or you want to create a modern, open work space that provides an inspiring combination of style, function and privacy — you will want to learn more about the power of LC Privacy Glass.

# EZ-CAP™

## *A Smart New Pre-Wire Solution*

### *DC Connections Exclusive Product...*

The idea for the EZ-Cap Pre-Wire Installation Kit was designed by an individual named James Corwin. James (Jamie) is the co-owner of "The Entertainer", an audio/video/security custom installation company, located in Jefferson City, Missouri. Over the past several years, The Entertainer's custom installation division has seen exponential growth, due to more customers needing solutions for home installations. The Entertainer was given contracts to do pre-wires for condos, townhouses, and custom homes by several developers. In working with these developers, Jamie saw the need for a better solution to hide wires in a way that was most appealing for the developers and customers. Electrical boxes were too conspicuous, bare wires were tacky, and putting the wires behind drywall made locating them later a difficult and time consuming process.

**The EZ-CAP Pre-Wire Installation Kit consists of two parts, the base cylinder and fan, and the cap that will hide the wires from view**

**The E-Z CAP Pre-Wire Installation Kit is easy to mount with the universal wings allowing custom spacing. In this picture, it is already mounted, with the wires tethered within the central cylinder.**

**Add the drywall and a coat of paint, apply the cap for a nice, clean, professional finish that also gives you easy location of your wires. Apply paint over the cap for an additional finished touch.**

***EZ Caps Construction Bracket not only allows precise speaker location, but the flexibility of installing the speakers of choice at any given time after the walls are up.***

***Most New Construction Brackets are speaker specific, which limits flexibility and options.***

# Yes, You Need To CALIBRATE!

## *Give Your HDTV A Makeover*

It's probably for the best that we consumers don't have access to the settings that will make our HDTVs look their best. Sure, you can use a calibration disc, but chances are good that the TV's menu controls won't let you do everything those discs suggest you do. The advanced stuff requires a trip to the HDTV's service menu, which is accessed by punching a secret code into your remote control. We don't advise that you do so, however, because you can ruin your TV.

The HDTV manufacturers keep the code a secret for a reason: Poking around in the wrong places can have devastating consequences. "Consumers should never go into the service menu," says Dat Nguyen. "If they don't know what they're doing, they will render the TV useless."

One ISF-certified calibrator we spoke with years ago during a calibration session told us the sad tale of a customer who entered the service menu and accidentally turned off the electron guns used to display an image on the screen. He couldn't see anything—including the service menu—and his television was essentially broken until the ISF calibrator arrived to save the day.

As if going into the service menu isn't perilous enough, there's not much the average consumer can do once they get there. You need pricey equipment to adjust the settings found there—exactly the kinds of equipment ISF-certified calibrators have. One of them is a color analyzer that is used to set the white balance of TV displays. Without that equipment, customers cannot accurately set the colors of their televisions.

What to expect from a

# CALIBRATE!

*See & Hear As You Should!*

The top 10 benefits of a properly calibrated TV are:

- Display a sharper focused, full resolution image.
- Show full detail in the darkest and lightest parts of all scenes.
- Be properly matched to your video system and viewing environment.
- Maintain accurate color balance at all picture light levels.
- Produce a full range of accurate colors, including flesh tones, grass, sky, and sports jerseys.
- Have a cinema theater "film look."
- Minimize picture artifacts and distortion.
- Be easier on your eyes.
- Increases the life of your TV.
- Watch your favorite tv shows, movies, sporting events the way it was meant to be seen.

# Automated Shades

## Several different control options

- QMotion shades offer the convenience of moving the shade up or down, stopping at any of the top, the bottom, three intermediate stops, or anywhere in between; all with the ease of a button press
- Lose your remote? No problem! QMotion shades can be moved up or down manually with no remote control. Simply give the shade a gentle pull.
- Interested in reducing your energy bills? The programmable timer remote can be set up to automatically move your QMotion shades. Automate your shades by time of day, day of week, sunrise, or sunset.
- Want to control many shades with just one remote? QMotion multi-channel remote controls 6 groups of shades, and a "control all," with one remote control. Each channel can have an unlimited number of shades programmed to it.
- Looking to have your shades connected to your home automation systems? Qconnect makes it possible for your home automation system to control your shades. With Qconnect's cutting edge technology, it supports communications with most building and home control systems.
- Desire to use your smartphone as your master control? Wireless Qsync technology and our QMotion iOS/Android Apps make raising and lowering your shades easier than sending a text.

**The new way  
to shade.**

Qmotion®

## Innovation never looked so beautiful

Imagine a motorized shade that quietly rises and lowers on cue. Imagine the simplicity of no wires, and the beauty and safety of no cords. Imagine a sleek and stylish design with the batteries and motor located directly inside the shade tube. Imagine the flexibility of programming shades to move in groups at intervals of your choosing. Think it sounds like wishful thinking? Think again.

### Unmatched quietness

- Through the use of four high-precision steel ballbearings, QMotion shades dramatically reduces the friction that exists when shades move. Less resistance means effortless motion, resulting in a level of quietness never before available in a motorized, wireless shade.

### Distinctive designs

- Generous fabric collection of light filtering, decorative and beautiful blackout materials.
- Industry leading minimized side gaps on the sides of the shade, cover all but 1/2 of an inch on either side of the fabric.

### Unparalleled simplicity

- Shade is powered by an internal pack of standard D-cell batteries, needing:
  - No cords
  - No electrician
  - No wires
  - No special tools
- Batteries last on average three to five years or more, dramatically reducing cost and adding convenience.

### The look you want

- QMotion shades offer several choices of fascia to conceal the top of the roller shade. Choices include a painted flat fascia and a fabric wrapped fascia. Both are available in a pivoting fascia style, which has a face which pivots up and out of the way, for easier access when required.

### Stress-free setup

- QMotion shades are unbelievably easy to use. Our shades can actually learn the height of your window with one easy step. Once learned, the shade will automatically generate preset open positions. Just use your remote to adjust to your preferred position, or manually adjust to any height by pulling the bottom bar.
- An option to preprogram the raising and lowering of the shades at preset times throughout the day adds an even greater level of simplicity - while helping to reduce home energy consumption.
- With QMotion, its never been simpler to take control over light and privacy.

**future automation**  
**PREMIER MANUFACTURERS**  
**OF MOVING AUDIO AND**  
**VISUAL SOLUTIONS**

Offering standard, customized and fully bespoke products, we are the leading manufacturer of moving architectural and audio visual solutions.

Our products are the quietest, most reliable and easiest to install on the market. Every motorized system is designed and built in the United States and backed by the industry's longest and most extensive warranty, making it the perfect choice for professionals and homeowners alike.

# Angie's list.

Reviews you can trust.

Angie's List members in Portland can turn to the site to find recommendations on reliable plumbers, contractors and other service providers. Portland is a progressive city long recognized as one of the greenest in the nation because of its efforts to preserve natural areas and protect the environment. Because of a long-standing Oregon law protecting farm and ranch land outside city boundaries, the City of Roses and neighboring cities like Beaverton, Lake Oswego, South Burlingame and Hillsboro don't experience as much urban sprawl as metro areas in other states. That means homes in the area are organized into dense neighborhoods of well-maintained homes. Whether to landscape a yard, eliminate mold or rot caused by the wet weather or put in a new heating system when the old one stops working, residents of Portland and the surrounding areas choose Angie's List and its member-recommended service providers for all their repair and home service needs. Find the best contractors and plumbers on Angie's List, and keep your Portland-area home in perfect condition. Join Angie's List Portland.

## *Awarded to DC Connections*

## DC Connections, LLC Receives 2019 Best of Portland Award

Portland Award Program  
Honors the Achievement

**Portland, April 13, 2019:**

DC Connections, LLC was selected for the 2019 Best of Portland Award in the Home Theater Design & Integration category by the Portland Award Program.

Each year, the Portland Award Program identifies companies that we believe have achieved exceptional marketing success in their local community and business category. These are local companies that enhance the positive image of small business through service to their customers and our community. These exceptional companies help make the Portland area a great place to live, work and play.

Various sources of information were gathered and analyzed to choose the winners in each category. The 2019 Portland Award Program focuses on quality, not quantity.

Winners are determined based on the information gathered both internally

by the Portland Award Program and data provided by third parties.

About Portland Award Program

The Portland Award Program is an annual awards program honoring the achievements and accomplishments of local businesses throughout the Portland area.

Recognition is given to those companies that have shown the ability to use their best practices and implemented programs to generate competitive advantages and long-term value.

The Portland Award Program was established to recognize the best of local businesses in our community. Our organization works exclusively with local business owners, trade groups, professional associations and other business advertising and marketing groups. Our mission is to recognize the small business community's contributions to the U.S. economy.
